Chh. Sambhajinagar, Maharashtra, India

Professional Summary

- Electronics and Computer Engineering student with a strong interest in software development and Java backend development. Skilled in Java, SQL, AWS, and Linux, with hands-on experience in Core Java concepts including OOP, arrays, exception handling, collections, multithreading, and file handling. Experienced in Java backend and machine learning projects using JDBC and MySQL, with an interest in cloud technologies, machine learning, and problem-solving.

Education

CSMSS Chh. Shahu College of Engineering

Bachelor of Technology in Electronics and Computer Engineering

Chh. Sambhajinagar, Maharashtra

Expected: May 2027

- CGPA: 6.58/10.0

Technical Skills

Programming Languages: Java, (OOP, Arrays, Strings, Collections, Exception Handling, Multithreading, File Handling, JDBC), SQL

Frontend Technologies: HTML, CSS

Cloud & DevOps: AWS EC2, AWS S3, Linux, RHEL

Databases: MySQL

Developer Tools: Git, GitHub, VS Code, Eclipse

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems

Projects

Banking Management System | *Java, JDBC, MySQL*

- Developed a banking application for account management, deposits, withdrawals, and transaction processing using Core Java.
- Implemented database connectivity and CRUD operations using JDBC and MySQL, with exception handling for reliable transaction processing.
- Utilized the Java Collection Framework for efficient management of customer and account data and applied multithreading for handling concurrent operations.

Expense Tracker | *Java, JDBC, MySQL, HTML, CSS*

- Developed an expense tracking application to manage income, expenses, and financial records using Java, JDBC, and MySQL.
- Implemented database operations using JDBC and applied exception handling for reliable transaction processing.
- Designed a simple HTML and CSS interface to display transactions and financial information.

Hydroseeding Smart Advisor | *AI/ML*

- Developed and trained a machine learning model to classify soil types from images and determine their suitability for hydroseeding.
- Built a web-based application that provides soil improvement recommendations based on the predicted soil type and analysis.

Library Management System | — *Java, JDBC, MySQL, Collection Framework*

- Developed a Java application to manage books, members, and book transactions
- Implemented CRUD operations using JDBC and MySQL with exception handling and Collections.

Achievements & Certifications

NPTEL Programming in Java – 75%

HackerRank Certifications: Java (Basic), Python (Basic), SQL (Basic) – All Verified

HackerRank Badges: Java (3-star), SQL (2-star)

Interests

- Java Backend Development
- Machine Learning
- Problem Solving and Data Structures & Algorithms
